AGENDA DSF 2024

May 20-22, 2025

From May 20 to 22, 2025, at FAO headquarters in Rome, the first congress was held, bringing together 160 forest owners, association leaders, and cluster directors to present and exchange information on the functioning of small, fragmented private forests. European private forests comprise 20 million owners who share 64 million hectares of forest. And there are nearly 6,000 forestry associations to support them.

Having suffered from heatwave conditions and water stress since 2018, the forest stands of the Grand Est region benefited from a year of respite in 2024. Abundant, sometimes excessive, rainfall provided the vegetation with a welcome break from reports of drought.
